Please Read Carefully Before Ordering

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out. However, we do not discriminate, our prices are the same in the spring as in the fall. Our stock is always guaranteed, early or late, our large storage facilities permit this.

GUARANTEE—We ship only first quality stock which grows easily. It is clean, insect pest and disease free, healthy and true to name. Every bulb is fully guaranteed as such. Should any prove otherwise, we will gladly replace or refund your original purchase price.

SUBSTITUTION—We do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal.

Large — $1\frac{1}{4}$ inches or more in diameter (Nos. 1 and 2).

Medium — $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter (Nos. 3 and 4).

Small — $\frac{1}{4}$ to $\frac{3}{4}$ inches in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All orders amounting to \$1.00 or more will be delivered free to all parts reached by Pcarels Post. Orders amounting to less than \$1.00 will add 15c for postage.

SALES TAX—**Only orders from Ohio**—which are not for resale of bulbs or flowers, will add 3% sales tax.

TERMS—Remittances should accompany your order, and should be made by check bank draft, American Express or Postal money order.

REFERENCE—For our standing, you may refer to:

The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-05**, means **2 for 5 cents**.

Prices as given in this catalog supersede all previous quotations.

SERVICE—As we are one of the largest producers of gladiolus, we offer the best, with courtesy, being fully appreciative of your patronage.

BULB PERFORMANCE—For the maximum performance or exhibition spikes—**Large** (over $1\frac{1}{4}$ ") are much to be preferred. **Medium** ($\frac{3}{4}$ to $1\frac{1}{4}$ ") bulbs are of blooming size but the flower is not as large and requiring more time to bloom; **Small** ($\frac{1}{4}$ to $\frac{3}{4}$ ") bulbs will at times bloom late in the season and are noticeably smaller in size; **Bulblets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

The gorgeous and popular pure pink.

INTRODUCING 3 BRAND NEW STEWART ORIGINATIONS FOR 1937

We are sure these varieties will meet with your hearty acceptance. They have been subjected to our usual exacting trials and have emerged at the top. They are offered for your consideration with our complete confidence in their ability to live up to our high standard of perfection.

Jessica Dragonette

Miss Jessica Dragonette, the popular star of the Cities Service Radio program, on the occasion of her visit to Cleveland, Ohio, was banqueted in the spacious dining rooms of the Horticultural Hall, The Great Lakes Exposition. Here and over the air I presented Miss Dragonette with a very beautiful bouquet of the gladiolus which were named in her honor. Miss Dragonette was thrilled with the beauty of this variety named in her honor and many times called attention to

the beauty of them in the bouquet and in her corsage; the event was indeed a very happy one.

MISS JESSICA DRAGONETTE
Lovely Star of the Cities Services Program,
is presented with a beautiful bouquet
of her namesake

The variety is an exquisite perfectly clear light rose-pink blending to a lighter throat—the entire flower has a blue sheen which gives it refinement and beauty. The habits of growth are perfect—strong and healthy of some better than medium height—the spikes are always erect and flowers are medium large with four or more open at one time—it is very early and we fully expect it to become a very popular variety.

Jessica Dragonette prices
—Any size bulb \$5.00 each.

You may indicate a preference of size. We will gladly comply with your request if at all possible.

Bulblets will be released
at \$5.00 per 3.

Success

Too much can hardly be said of this perfectly pure white. It can well be called "streamlined" with its tall and gracefully tapering spike. The flowers are large and wide open, five or more of them open at one time, are carried attractively on an always tall erect spike of 20 or more buds, and it is early. The plant is of strong, healthy growth, and a good producer. This variety produces an excellent cut flower, its keeping qualities when cut are unexcelled even in the extreme summer heat; it holds up perfectly. When cut and placed in water every bud will open wide to the extreme tip of its long, strong spike.

"Success" has been cut and shipped to New York, a distance of over 500 miles, arriving in perfect condition. The florist receiving them commented on them as follows: "It is easily the finest spike and flower of white that I ever worked with, they are all so uniform, I wished that I had them for all my work."

We feel that the most valuable comments on a new variety are the ones coming voluntarily from those who grow them, see them and use them. "Success" has been lavished with the most favorable comments from every source.

This variety has been most consistent in its production of wonderful spikes and large, wide open flowers. We can unhesitatingly predict a really "Successful" future for it.

SUCCESS prices—Stock of this variety is limited; having been requested by many the quantity to each purchaser will necessarily be limited.

Any size bulb \$10.00 each. You may indicate a preference of size. We will gladly comply with your request if at all possible.

Bulblets will be released at \$10.00 for 3.

Alfred M. Landon

The little town of West Middlesex, Pa., was the scene of the homecoming event for Alfred M. Landon—an occasion long to be remembered in that section. With the special permission of Mr. Landon we named an excellent soft scarlet seedling in his honor which we used freely in decoration, including the little church which he attended. Mr. Landon expressed himself as being delighted with the flower.

This variety too is early, and a soft clear scarlet. The flowers are large with 6 to 10 open at one time on a tall, strong, and always straight spike—a healthy, good growing plant and good propagator. This is an excellent color and a valuable early cut flower.

Alfred M. Landon prices—Any size bulb \$5.00 each.

You may indicate a preference of size. We will gladly comply with your request if at all possible.

Bulblets will be released at \$5.00 per 3.

Major Edward Bowes (1936)

The Major Edward Bowes variety is one that you can enjoy fully, as it is of vigorous growth, healthy and a massive plant. The flowers are large, a bitter-sweet pink with an overlay of a slightly deeper tone; the small pinard yellow throat adds much to the attractiveness and beauty of this variety. The spikes are very tall and strong, built to carry well the many flowers that open at one time, up to 12. This is an excellent cut flower variety with perfect keeping qualities and always in demand. A good propagator.

Prices on Major Edward Bowes.

Major Edward Bowes and His Amateur Hour and Stewart Gladiolus

VIEW OF STAGE, OPENING NIGHT, RADIO THEATRE, NEW YORK CITY

On September 17, 1936, The Major gave his initial program for the Chrysler Corporation in his new studio on Broadway, New York City, a truly gala event. It was our privilege to decorate the entire stage with Stewart gladiolus for the occasion. Three giant baskets of our variety Major Bowes at strategic points on the stage were very effective and received special mention over the air, in addition to his most favorable remarks on the entire display. After growing this variety in his garden this year, he still considers it "overwhelmingly beautiful."

Phyllis McQuiston (1933)

This gorgeous pure pink variety of our origination, illustrated on our front cover page, has been the source of many most gratifying letters of commendation. It has proven conclusively that it is a thoroughly consistent grower for all. In the garden it grows freely and easily, producing its tall, erect spikes and its large pure pink flowers, that are enjoyed fully by the many who have grown it.

The blue ribbon spike of Phyllis McQuiston at the American Gladiolus Society Show was grown by an amateur who had but one bulb of the variety. The spike and ensemble was grand, spike tall and strong (they are always straight) carrying 22 buds, with eight mammoth and perfectly placed flowers open at one time. He will receive as a reward for his effort a bulb of Major Bowes; we wish him continued success.

Commercial growers and florists are enthusiastic with their praise of its rare beauty, strong growing habits and its ability to stand heat and shipping. In the greenhouse this variety has proven that it has no peer, repeatedly producing 100% first quality spikes and flowers. Truly this variety is thoroughly practical as well as a gorgeously beautiful variety and you too can and should both enjoy and profit with Phyllis McQuiston. This variety has been shown at all the large shows and many others from Chicago to New York, always receiving the highest honors and the praise of all.

For prices on Phyllis McQuiston see Retail page 20. Wholesale page 28.

OUR INTRODUCTIONS OF 1936

Last year in addition to the variety Major Edward Bowes we offered two other varieties, which we felt were worthy and beautiful. The reception these varieties, ELSIE ADELE and BLUE BIZARRE have received has born out our opinion fully.

Elsie Adele

Has that natural appeal of feminine youth and beauty; it is a perfectly clear, soft, blush LaFrance pink, the spikes are tall, always carried erect and graceful, five or more flowers are open at one time with 18 or more buds. The plant of this early variety is clean and healthy, the bulblets are produced in quantity and germinate well. At the Great Lakes Exposition in Cleveland, visiting florists gave unstinted praise to the high quality of this variety as a cut flower—its ensemble and beauty in their estimation are all that could be desired.

Prices on Elsie Adele.

Per	Large	Medium	Small	Bulblets
1	\$3.00	\$2.00	\$1.00	1—\$.30
10	24.00	16.00	8.00	10— 2.40

Blue Bizarre

Is startlingly attractive. The under color of this variety is a light violet-blue, long streaks of medium violet-blue overlay much of the flower, these are again overlaid with dark violet-blue, very pronounced and effective. The plant is strong and healthy and a good producer. Spikes are medium tall with medium large sized flowers. The immense interest shown in this variety here in our gardens and at the many shows this past season would indicate that this variety too would soon be among the popular novelties. The flower is all that the name implies.

“Your Assurance of Beautiful Flowers”

We devote over 200 acres to the scientific production of quality gladiolus bulbs. Our helpers are experienced and keyed to a high standard of excellence. Machinery and equipment are modern and efficient, our storage facilities are equally modern and large, as are our offices for the exacting and careful attention given your order.

Margaret Stewart (1935)

This variety has completely won amateurs and growers alike, its refinement and dignity are beautiful and perfectly carried. The flowers are large, of a distinctly new shade of red-red rose—the spikes are

tall always erect and carry gracefully five or more flowers open at one time on a spike of 16 or more buds. The plant is healthy and a good grower and producer, truly an excellent variety.

MARGARET STEWART

At the American Gladiolus Society Show, Akron, Ohio, a large round vase of this variety, nicely arranged, received the unanimous approval of the many growers present. One large grower said of Margaret Stewart, "A distinctly new color and a beauty, a color we need."

Nationally renowned judge of flower shows, Mr. Walter Brown in Horticultural Hall, at the Great Lakes Exposition, Cleveland, Ohio, pronounced Margaret Stewart "The most beautiful thing he had ever seen." Indeed it was as he had staged it in a striking basket at the edge of the pool where its mirror like reflection appeared in the water surrounded by ferns and trailing ivy.

Margaret Stewart prices.

Our Introductions of 1935

These varieties have received a real welcome, even greater than did our previous introductions. The many letters of praise from those who have grown them, amateurs, connoisseur and grower alike, speak most emphatically of the true value of our originations.

ALICE HERRIOTT. A beautiful shade of rich cherry-rose, with just a cast of blue to the upper throat. The eight or more large flowers open at one time are nicely placed on a tall, always straight, strong spike, carrying 18 or more buds. A good grower and certain to become very popular.

Large ea. \$3.50	Med. ea. \$2.80	Small ea. \$2.00	Bulblets ea. \$.60
per 10 \$30.00	per 10 \$22.40	per 10 \$16.00	per 10 \$4.80

ELITE. The florets are gracefully waved and large, which materially adds to the beauty of this distinctive salmon-pink to peach-red flower, with its creamy Neapolitan throat and median lines. The spike is very tall and strong with 18 or more buds, eight or more open flowers. A fast propagator and a particularly valuable new variety.

Large ea. \$3.00	Med. ea. \$2.20	Small ea. \$1.40	Bulblets ea. \$.50
per 10 \$24.00	per 10 \$17.60	per 10 \$11.20	per 10 \$4.00

Our earlier introductions will be found in their alphabetical order in this catalog. They are Precious, Village Queen and Phyllis McQuiston—1933; Euclid, Totem, and Colfax—1934

Golden Goddess

By Salbach—(Patented)

This marvelous new yellow is protected with the first United States Plant Patent issued for a gladiolus. The variety fully merits this protection as it is easily the most outstanding yellow gladiolus ever introduced.

The flower, a soft clear golden yellow is of medium size on a strong spike. It consistently holds ten or more florets open at one time with a total of 20 or more buds to the entire spike. The florets open well after cut, and promises to become one of our most popular varieties.

Unsolicited comments on this variety come from all over. They warmly praise Golden Goddess, with claims of 26 buds to the spike and 16 florets open, and numerous reports of blue-ribbon winnings for the best yellow and best spike in their respective shows.

The purchaser of Golden Goddess bulbs (patented) is given the right to grow the bulb for his own use and enjoyment, but is specifically prohibited from selling, leasing, giving away, or otherwise transferring either bulbs, bulblets, or cuttings without written consent of patentee.

Golden Goddess prices: Large bulbs only—each \$1; three for \$2.50.

HAVE YOU FOUND in our catalog just what you would like. If not, may we help? Many write us telling us what they would like or would like to do, leaving the selection of varieties to us.

THE NEW ENGLAND GLADIOLUS SOCIETY

will welcome you as one of its members. You will enjoy the annual publication "The Gladiolus." It is well edited and printed and full of interesting and valuable information on the Gladiolus. Annual Membership of \$1.00 includes a copy of this 275 page book. Address the Secretary, Albin K. Parker, Norwood, Mass.

SPECIAL VALUES IN

ASSORTMENTS

Unsurpassed in Quality, Attractively Low in Price

Those who do not care to grow the varieties separately and by name, but who do want the very best of flowers, will find the following assortments will more than satisfy. We do not grow a mixture. These assortments are made up FOR YOU. If you have a preference for any particular color, we will be happy to put forth every effort to meet your request. The very large number of varieties which we grow are representative of the best efforts of the leading originators from all over the world. This enables us to offer you ASSORTMENTS THAT ARE UNEQUALLED in wide color range, choice varieties and quality stock. This includes plain petaled, ruffled and other types of flowers. The various varieties are NOT labeled as to their names. Please order by number.

No. 1. This is our most popular assortment, all large flowers. We have large numbers of complimentary letters on this collection. It will please you. Over 40 different varieties. 100 "L" bulbs, \$3.00; 50 "L" bulbs, \$1.50; 25 "L" bulbs, 80c.

No. 2. Primulinus. This assortment contains about 30 different varieties of this artistic type. The color range is very wide and includes plain and ruffled petaled varieties. For those who prefer this type which is so desirable for table decoration, this assortment cannot be equalled at this very low price. 100 "L" bulbs, \$3.00; 50 "L" bulbs, \$1.50; 25 "L" bulbs, 80c.

No. 3. This assortment is the same as No. 1, except that it has many of the newer and higher priced varieties. A real value. 100 "L" bulbs, \$4.80; 50 "L" bulbs, \$2.40; 25 "L" bulbs, \$1.25; 12 "L" bulbs, 80c.

Medium size bulbs of the above offers at one-half the price.

From NEW YORK to CHICAGO

Stewart gladiolus have been displayed with distinguished success. They have been praised lavishly by amateurs, the connoisseur, commercial growers and florists alike. They have reflected conclusively the unequalled high standard of quality maintained in our bulbs, from which you too can grow prize winning flowers.

CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any part of our U. S. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be they amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL—Any good garden soil is very satisfactory; it is important that the soil should not be worked when wet, and should be kept pliable at all times during the growing season.

LOCATION—They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTION—Precautionary measures guarding against insect pests and bulb troubles are very effective and most economical. The garden should be cleaned and the old tops of gladiolus as well as the tops of other plants and other refuse should be raked up and burned. The storage room should be clean and disinfected as well as the bulb containers before using them to store bulbs over winter. Disinfecting all bulbs before planting is an easy task and is advisable as it will practically eliminate any disease or insect pest. We offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury poison to 10 gallons water (B. of M. is more soluble in warm water), soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); a simple procedure is to place bulbs in salt or sugar bags, tie strong string around top of bag, other end of string carrying the variety name on it, drop in solution, a stick will punch them under—after soaking, remove, hang up by string to dry; they may be planted wet. Use non-metallic container for the B. of M.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one; cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide. To get a nice spike with it, slide the knife down close to spike on one side stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming, or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.

WHOLESALE PRICE LIST

PRICES ARE F. O. B. BURG HILL, OHIO

Priced Per 100: The 1,000 rate is 8 times the 100 rate.

Not less than 250 of the same variety and size at the 1000 rate.

Not less than 25 of the same variety and size at the 100 rate.

Bulblets—1 pint or $\frac{1}{2}$ pint at the quart rate.
